ZENOPIX NEO

Art-Net DMX Animation Software

With Zenopix NEO software, you can seamlessly control Art-Net DMX devices regardless of brand or model, without pixel or universe limitations, and create unlimited animations.

zenopix.com

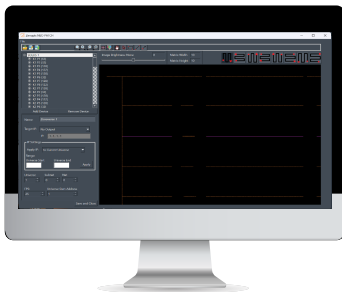

Key Features

- Unique pixel mapping feature,
- Creating multiple scenes for large designs.
- Unlimited universe and pixel design.
- Creative designs even for low-resolution LED screens.
- Optimized data processing for smooth and flicker-free performance.
- You can create your own profiles and define your fixture in the Patch Editor section.

Simultaneous Playback and SD Card Recording

- Transfers real-time Art-Net data to DMX receivers and allows you to create offline animations that can be recorded onto an SD card for Zenopix AER and SOLUS devices.

Pixel Mapping with Different LED Types

- You can control a large number of different types of LED fixtures.
- You can position pixels in any shape and form.
- With pixel-by-pixel mapping, you can create sharp and clear visuals even at the lowest pixel resolution.
- You can easily define 1, 2, 3 (RGB), and 4-channel (RGBW) configurations and other variants.

Live Effects and Compositions

- You can adjust the scale and position of dynamic animations to suit your needs, add live effects to enhance your videos, and achieve the best image quality by blending or speeding up effects.

Real-Time Operations Compatible with All Devices

- You can mix and edit animations and videos by applying various effects.
- All visual effects can be dynamically altered, and you can add your desired videos as effects.

It is fully compatible with Art-Net devices such as Magus,

- Velox, and ELEA, as well as many other Art-Net DMX devices like Madrix, Enttec, LedTech, and Pharos.

Zenopix is an R&D, manufacturing, and technology company deeply specialized in lighting control systems, with nearly 20 years of extensive experience in electronics and software.
